

*Without AZOMITE® added*

*Treated with AZOMITE® Granular*

June 10, 2005

I just went to lemon and grape gardens where they tested AZOMITE®. The lemon garden had a problem of some disease and poor productivity. After using AZOMITE®, the result of lemon tree is very good, but they only used 300 g/tree. They used AZOMITE® every 3 months, or 1.2 kg/tree/year. The leaves are darker and now the trees are very healthy looking. The productivity has increased a lot (30-40 % more).

Best Regards,

Sarapong
